

Does this software fit? Show the evidence.

PUBLIC FICTIONAL DEMONSTRATION - VERSION 1.0.0

Fictional demonstration. Fieldwork A, Fieldwork B, LedgerOne and the evidence below are invented. Broadcastwell prepared this public vendor-enablement demonstration; it is not an independent certification, a client result or an AI-search measurement.

Buyer settings

Offline-first requirements; 3 locations; 25 named users; USD 1,300 monthly ceiling. Evaluation date: 2026-10-04. These are fictional software-budget inputs, not Broadcastwell pricing.
Budget excludes implementation, taxes and optional services. No human product-fact approval has been obtained.

Fieldwork A	Fieldwork B
Not a fit for a must-have 3/4 must-haves documented; 0/1 useful preferences documented. Commercial maintenance workflow - Supported Documented in current fictional evidence. Check the source for plan and workflow limits. [A01] Operating locations - Supported Documented limit: 5 locations. Buyer requirement: 3. [A01] Read downloaded jobs offline - Supported Documented in current fictional evidence. Check the source for plan and workflow limits. [A02] Edit downloaded jobs offline - Does not meet Current fictional evidence explicitly says this requirement is not supported. [A02]	Candidate on stated must-haves 4/4 must-haves documented; 1/1 useful preferences documented. Commercial maintenance workflow - Supported Documented in current fictional evidence. Check the source for plan and workflow limits. [B01] Operating locations - Supported Documented limit: 10 locations. Buyer requirement: 3. [B01] Read downloaded jobs offline - Supported Documented in current fictional evidence. Check the source for plan and workflow limits. [B02] Edit downloaded jobs offline - Supported Documented in current fictional evidence. Check the source for plan and workflow limits. [B02]

One failed must-have blocks fit. Missing, stale or conflicting evidence cannot establish support. Preferences do not offset a deal-breaker. A candidate verdict is limited to the stated requirements; it is not approval to purchase. This PDF summarizes the evaluation. Complete reasons and editable structured data are in the accompanying Markdown and JSON.

All requirements and priorities

Fieldwork A

Requirement	Priority	Evidence state	Sources
Commercial maintenance workflow	Must-have	Supported	A01
Operating locations	Must-have	Supported	A01
LedgerOne Online invoice sync	Not selected	Supported	A01
Read downloaded jobs offline	Must-have	Supported	A02
Edit downloaded jobs offline	Must-have	Does not meet	A02
EU-only application data and backups	Not selected	Does not meet	A03
SAML single sign-on	Not selected	Needs current evidence	A04
Recurring configuration within budget	Useful	Conflicting evidence	A05, A06

Fieldwork B

Requirement	Priority	Evidence state	Sources
Commercial maintenance workflow	Must-have	Supported	B01
Operating locations	Must-have	Supported	B01
LedgerOne Online invoice sync	Not selected	Does not meet	B01
Read downloaded jobs offline	Must-have	Supported	B02
Edit downloaded jobs offline	Must-have	Supported	B02
EU-only application data and backups	Not selected	Not established	None
SAML single sign-on	Not selected	Supported	B02
Recurring configuration within budget	Useful	Supported	B03

A05 and A06 remain conflicting current prices. A04 is stale. No B source establishes EU-only data and backups. Those states remain visible even when a requirement is not selected.

Questions and proposed corrections

Fieldwork A

Edit downloaded jobs offline - Does not meet

Show an offline edit, reconnection and conflict resolution without skipping steps. [A02]

Recurring configuration within budget - Conflicting evidence

Provide one authorized quote for our actual configuration, with implementation, tax and optional charges separated. [A05, A06]

Fieldwork B

No selected evidence gap in this fixture. Still validate actual workflows, security needs and final commercial scope.

Proposed work for Fieldwork A

C01 / Make the offline limitation explicit

View previously downloaded jobs offline. Job edits, uploads and signatures require an internet connection.

PROPOSED_COPY_ONLY | Sources: A02

The wording matches the documented limitation. Do not change the offline-edit verdict or imply a product feature was built.

C02 / Resolve the conflicting price

Confirmation required: this packet contains conflicting recurring prices for three locations and 25 users. Request one authorized quote before making a budget decision.

NEEDS_VENDOR_FACT_CONFIRMATION | Sources: A05, A06

An authorized owner resolves the conflict and explicitly supersedes the obsolete price. Do not choose the lower value or silently overwrite either source.

C03 / Refresh the SAML evidence

SAML is described in an older overview. Current plan availability needs confirmation; request the current access guide before treating it as a requirement match.

NEEDS_CURRENT_EVIDENCE | Sources: A04

A current, permissioned source identifies the evaluated plan and SAML support. A new date by itself is not evidence.

No correction has been published. Copy changes cannot create a missing capability. No organic AI-search result, buyer demand, sales uplift or commercial outcome has been measured.

Full fictional source register 1/2

Every source is authored synthetic material, not a real vendor document or independent validation. Source review dates are fixture data; all human approvals remain null.

A01 / Fieldwork A: product guide

Product: field_a | Service teams and locations

Effective 2026-09-20 | Reviewed 2026-10-04 | Review by 2026-11-30 | active

Fieldwork A is designed for commercial maintenance teams. One workspace supports up to five operating locations. LedgerOne Online synchronization transfers approved invoices; it does not synchronize payroll, inventory or every accounting object.

A02 / Fieldwork A: mobile guide

Product: field_a | Offline behavior

Effective 2026-09-20 | Reviewed 2026-10-04 | Review by 2026-11-30 | active

Technicians can view previously downloaded jobs without a connection. Creating or editing jobs, uploading photos, and collecting signatures require an internet connection. Offline editing is not supported.

A03 / Fieldwork A: hosting statement

Product: field_a | Data-region availability

Effective 2026-09-20 | Reviewed 2026-10-04 | Review by 2026-11-30 | active

The current service stores application data and backups in US regions. No EU-only hosting option is offered in this version. This statement does not establish regulatory compliance or noncompliance.

A04 / Fieldwork A: older security overview

Product: field_a | SAML single sign-on

Effective 2026-06-01 | Reviewed 2026-08-01 | Review by 2026-09-30 | active

The June overview describes SAML single sign-on on the Team plan. The document must be reviewed by 30 September 2026. No replacement or current plan confirmation is present in this fictional packet.

Full fictional source register 2/2

Every source is authored synthetic material, not a real vendor document or independent validation. Source review dates are fixture data; all human approvals remain null.

A05 / Fieldwork A: current price card

Product: field_a | Three locations, 25 named users

Effective 2026-10-01 | Reviewed 2026-10-04 | Review by 2026-10-31 | active

The Team package for exactly three locations and 25 named users is listed at USD 960 per month. Taxes, implementation and optional services are excluded. This price card has not been reconciled with the quote worksheet.

A06 / Fieldwork A: quote worksheet

Product: field_a | Same configuration as current price card

Effective 2026-10-01 | Reviewed 2026-10-04 | Review by 2026-10-31 | active

The quote worksheet lists USD 1,290 per month for the same Team package: exactly three locations and 25 named users. Taxes, implementation and optional services are excluded. Both this worksheet and the USD 960 price card are marked current; neither is designated authoritative.

B01 / Fieldwork B: product guide

Product: field_b | Service fit, locations and accounting

Effective 2026-09-22 | Reviewed 2026-10-04 | Review by 2026-11-30 | active

Fieldwork B serves commercial maintenance teams with up to ten locations per workspace. It does not offer a native LedgerOne Online synchronization. CSV export is available, but is not equivalent to native synchronization.

B02 / Fieldwork B: mobile and access guide

Product: field_b | Offline editing and sign-on

Effective 2026-09-22 | Reviewed 2026-10-04 | Review by 2026-11-30 | active

Downloaded jobs can be read and edited offline, with changes synchronized after reconnection. Duplicate-edit conflicts require review. SAML single sign-on is documented for the evaluated Team plan. The guide contains no data-residency commitment.

B03 / Fieldwork B: configuration price

Product: field_b | Three locations, 25 named users

Effective 2026-10-01 | Reviewed 2026-10-04 | Review by 2026-10-31 | active

The evaluated Team package costs USD 1,250 per month for exactly three locations and 25 named users. Taxes, implementation and optional services are excluded. There is no supported price in this packet for other configurations.
